Top Skills

Internal Controls
Process Automation
Business Analytics

Joan Shirazi

Data Scientist & AI Enthusiast | Python, ML, LLMs & Generative AI | FAU M.Sc. Data Science | Werkstudent (SFS AX) @ Siemens
Erlangen, Bavaria, Germany

Summary

Data Scientist with 6+ years turning messy data and manual processes into automated, AI-driven systems. I build ML models (TensorFlow, Scikit-learn) for pattern detection and forecasting, and increasingly work with LLMs and generative AI to automate workflows that used to take teams days — most recently cutting internal audit and conformance processing time by up to 90% at Siemens using Power Automate + LLM-based automation. Previously at JNSQ Analytics, I led development of a scalable analytics platform — building ML models to detect performance patterns, designing production ETL pipelines processing 7M+ rows daily, and shipping Power BI dashboards that sped up business decisions by 10%+. I'm currently completing my M.Sc. in Data Science at FAU Erlangen-Nürnberg (coursework in ML in Finance, Deep Learning, and Federated Learning), backed by certifications across Power BI, data engineering, and advanced analytics. Core skills: Python (NumPy, pandas, scikit-learn) · SQL · TensorFlow & PyTorch · OpenAI LLM / GenAI applications · Power BI · ETL & data pipeline automation · AWS, Docker Based in Erlangen, Germany — open to full-time Data Scientist roles anywhere in Germany.

Experience

Siemens

Werkstudent - Assurance Excellence (AX)
October 2025 - Present (11 months)
Munich

• Applied AI and LLMs to automate internal controls and auditing processes, cutting processing time by up to 50% and manual workload by up to 90% in select use cases

• Built and deployed Power Automate + LLM-based workflows to fast-track conformance auditing across a wide range of use cases

• Partnered cross-functionally to complete detailed internal audits within tight 3–4 week cycles without sacrificing accuracy
• Tools: Power Automate, LLMs/GenAI, Excel, Power BI

JNSQ Analytics
Senior Data Scientist
March 2021 - March 2023 (2 years 1 month)
Islamabad

• Led development of a scalable analytics platform, building ML models (TensorFlow, Scikit-learn) to detect performance patterns in player and team data
• Designed and built production ETL pipelines and a data warehouse in Python and SQL, processing 7M+ rows daily
• Built interactive Power BI dashboards for real-time KPI tracking, improving dashboard load time by 10% and accelerating business decisions
• Tools: Python, TensorFlow, Scikit-learn, SQL, Power BI

i2c Inc.
Associate Software Engineer
July 2020 - February 2021 (8 months)
Lahore

• Automated data pipelines and SQL reporting for Mastercard/Visa compliance (QMR, QOC), cutting manual workload by 60% for 150+ global fintech clients
• Developed interactive dashboards using Tableau and Excel, enabling faster fraud detection and customer segmentation by analytics teams
• Used SQL and Python to streamline ETL processes, improving data accuracy and reducing turnaround time

---

Education

FAU Erlangen-Nürnberg
Master of Science - MS, Data Science · (April 2023 - October 2026)

National University of Computer and Emerging Sciences
Bachelor of Science - BS, Computer Science · (August 2016 - July 2020)
